

⚠ Please do not reach out to reviewers directly; messaging them will not speed up your review.

After Submission

What happens after you submit your task, and how to handle feedback.

Review Timeline

STAGE	DURATION
Automated CI checks	Immediate
Peer review assignment	1 day
Initial review	1-7 business days
Follow-up reviews	1-7 business days
Total	7-14 business days

Review Process

1. Automated Checks

Immediately after submission, your task goes through:

- CI checks (syntax, structure, dependencies)
- LLMaJ checks (quality, completeness)
- Oracle agent run

2. Peer Review

A qualified coding expert reviews:

- Task clarity and correctness
- Solution validity
- Test coverage
- Anti-cheating measures
- Overall quality

3. Agent Evaluation

Your task is run against:

- GPT-5.5 with Codex agent (5 runs)
- Claude Opus 4.8 with Claude Code (5 runs)

Pass rate determines final difficulty classification.

Review Outcomes

Approved ✓

Congratulations! Your task is accepted.

- Task added to benchmark suite
- Credit recorded in your profile

Changes Requested

Reviewer identified issues that need fixing.

What to do:

1. Read feedback carefully
2. Understand each requested change
3. Make fixes locally
4. Re-run all checks
5. Resubmit / push updates

Declined ✕

Task doesn't meet criteria. Common reasons:

- Too easy
- Unclear requirements
- Similar task already exists
- Fundamental design issues

What to do:

1. Review the feedback
2. Consider if it can be salvaged
3. Either significantly revise or start fresh
4. You can appeal if you disagree

Addressing Feedback

Read Carefully

Understand exactly what's being asked:

- Is it a minor fix or major revision?
- Does reviewer explain the reasoning?
- Are there specific lines/files mentioned?

Make Targeted Changes

Don't rewrite everything. Fix only what's needed. Use the [Reviewer Checklist](#) to make sure all high-severity and relevant medium-severity criteria are covered before resubmitting.

Explain Your Changes

When you resubmit: **Platform:** Add a note with your revision summary.

Re-request Review

After pushing changes, let the reviewer know: **Platform:** Update submission status

Disagreements

If you disagree with feedback:

1. **Respond politely** with your reasoning
2. **Provide evidence** for your approach
3. **Be open** to compromise
4. **Escalate** to Slack if needed

Remember: Reviewers want to help. Most disagreements are resolved through discussion.

Tips for Faster Acceptance

1. **Run all checks locally** before submitting
2. **Follow the checklist** exactly
3. **Write clear documentation** in `instruction.md`
4. **Address feedback promptly**
5. **Ask questions** if feedback is unclear
