Security & Cryptography

▼ Long Context 111

LONG CONTEXT

Debug and Extend Cargo Rng Provenance Analysis

58a39705-8b1b-44a0-9a58-26fb6cf3ca54

A 70,000-token Markdown cryptography dossier defines RNG, feature-flag, and zeroization rules...

Python Bash

LONG CONTEXT, API INTEGRATION

Debug Django TUF Metadata Policy Checks from Audit Report

99d603fe-8373-47d8-8371-5814c0419d75

A 70k-token HTML audit report describes why the Harborline update service accepted unsafe TUF reposito...

Python Makefile YAML +1

<> Extra Inspiration

LONG CONTEXT, TOOL SPECIFIC, API INTEGRATION

Debug Flask FFmpeg Preset Signature Auditing

b8ea894b-f542-49d4-b18a-b6cf542a518a

A 65k-token Markdown security specification defines how Helios Media Gateway signs, canonicalizes, and...

Python

LONG CONTEXT

Debug PHP MLflow Tracking Policy Checks from Long Audit Dossier

6ee4e861-43b0-4862-968d-debeb08c0215

A 70k-token MLflow tracking security dossier describes final policy decisions for TLS enforcement, artifact-store...

PHP

<> Extra Inspiration

TOOL SPECIFIC, LONG CONTEXT

Debug PostgreSQL SCRAM and TLS Config Migration

a454d40c-b75b-484c-b23f-d271ed9e964a

With only a 70k-token Markdown migration runbook as the source of truth, the legacy PostgreSQL 9.6...

Python

<> Extra Inspiration

TOOL SPECIFIC, LONG CONTEXT

Debug TypeScript curl, httpie Auth Graph Decoder

99f82596-d122-41a2-b79f-d92e43656151

With only a 70k-token incident dossier and captured curl/httpie exchanges, the AuthGraph edge format must be...

TypeScript Bash

<> Extra Inspiration

DB INTERACTION, LONG CONTEXT

Extend FastAPI Maven JAR Verification with DuckDB Policies

LONG CONTEXT, API INTEGRATION, DB INTERACTION

LONG CONTEXT

Extend Go TLS Worker with OpenSSL Chain Auditing

c14c6bc2-1e90-422f-a959-f10edff1859a

A verified FastAPI decision service should accept Maven coordinates, download the live upstream JAR from...

Python SQL Bash

<> Extra Inspiration

Extend FastAPI Recovery Authorization with Redis Nonce

7d9bd36c-e2dc-427b-b839-8070ebb450c0

The Atlas key-custody service already stores recovery sessions in Redis but cannot authorize break-glass requests...

Python

07a9b263-cee7-4149-8f21-cf879fbd3c2a

Extend the existing `certwatchd` Go background worker so it can classify TLS certificate failures using OpenSSL...

Go Bash

LONG CONTEXT

Extend Java Cose Receipt Verification for CSV Ledgers

b991ced6-65e0-4f93-bdfd-f110adec4539

The farebox receipt verifier rejects valid offline batches after a transit agency key rollover because the existing Java...

Java Bash

LONG CONTEXT, TOOL SPECIFIC

Extend Java SentinelAudit with jq-Based JWT Rotation Analysis

c41b65a0-d77f-43cc-b313-ad16712fad60

Extend the existing Java SentinelAudit analyzer so it can evaluate jq filters against a large mixed JSONL security...

Java Bash

<> Extra Inspiration

LONG CONTEXT

Extend Node.js Key Rotation Analysis with strace and Isof

f864499c-41cf-4e51-b5cc-adddda7b8263

Without network access, the existing Node.js certificate-graph pipeline must infer key exposure from local process...

JavaScript Bash

<> Extra Inspiration

LONG CONTEXT

Extend Spring Boot AES-GCM Rewrap Authorization with jqwik Properties

d2406f77-3b12-4da2-8b82-06871052ce9c

LONG CONTEXT

Extend Terraform Crypto Ledger Auditing in JavaScript

ebbcdab3-2fbb-4589-9802-9875a910f467

The existing audit library misclassifies several Terraform-managed KMS keys because it ignores rotation exceptions...

LONG CONTEXT

Extend TypeScript CertWatch Worker with Graphviz Revocation Paths

4e129adf-f4f5-4990-a61e-e6eb0fe68a80

Authorized secret envelopes can be rewrapped only when the Spring Boot CustodyRing service applies the...

Java SQL

JavaScript

The CertWatch background worker is falsely quarantining partner code-signing certificates whenever a rollov...

TypeScript

LONG CONTEXT

Extend TypeScript Terraform KMS Exception Auditing

8583a015-b508-4c67-b255-89c1fd1cfe31

Production KMS drift reports are falsely approving expired encryption exceptions because the existing...

TypeScript

<> Extra Inspiration

LONG CONTEXT

Fix Python HMAC Media Signing Worker After Key Rotation

38afc776-28ae-48cf-b375-4f1ebde5253c

Signed thumbnail manifests from `img-signer` are being rejected in production after a rushed HMAC key...

Python Bash

<> Extra Inspiration

LONG CONTEXT, API INTEGRATION

Harden a Polars Js Cryptography Audit Endpoint

aeb1efb8-7d9f-4686-9314-4f829b27a691

The SentinelGate Node service exposes `/audit/crypto-posture`, an endpoint that flattens nested service inventory...

JavaScript

LONG CONTEXT

Harden a Python Container Policy Worker with DuckDB

6b6ba6ce-532c-4f8c-a4b4-9dc6241dd16e

Harden the Acme container policy worker so insecure default container specs are rewritten according to the...

Python

LONG CONTEXT

Harden a Python JWKS Reconciliation Endpoint

183b0e85-6194-4ea6-a31c-cb824e9185f7

The Meridian SSO reconciliation service rejects valid tokens because its nested JSON key-rotation fixture conflicts wit...

Python Bash

DB INTERACTION, LONG CONTEXT

Harden a Python Ledger Signing Worker with Hugging Face Retrieval

cf8cce9d-8604-42c5-800b-8bfd1e47e38c

The existing Python signing worker rejects valid wire-transfer rows and approves several replayed rows after ...

Python JavaScript

<> Extra Inspiration

API INTEGRATION, LONG CONTEXT

Harden a Rails Certificate Renewal API with Rego Trace Policies

f0ee914c-b2a4-490b-b254-48b89726b666

A 70k-token incident dossier for the Rails-based Gatehouse CA API mixes operator chat, code-review notes, and...

Rego Ruby Bash

<> Extra Inspiration

<> Extra Inspiration

LONG CONTEXT, API INTEGRATION

Harden an Express Chronicle Escape API with Python Work

f36052b3-6659-4252-879a-37753da4d16c

Harden the Chronicle Escape Express API that drives a terminal escape-room challenge by replacing unsafe default...

Python JavaScript

<> Extra Inspiration

LONG CONTEXT

Harden Cargo Credential Provider Configs with TypeScript Schemas

bc09d6b7-4a8d-45db-97c1-ef17af7c5f23

A 70k-token Cargo supply-chain handbook and a mixed YAML, TOML configuration set define conflicting...

TypeScript

API INTEGRATION, LONG CONTEXT

Harden Django SAML Policy Loading with GNU Make Checks

fa643376-2e03-4695-87f3-60303ebe0011

A 90k-token federation onboarding transcript and a mixed YAML, TOML policy bundle define the real SAML...

Python

<> Extra Inspiration

API INTEGRATION, LONG CONTEXT

Harden Flask JWT Defaults with Perl Reflog Recovery

5e82b54f-2d0c-453e-b093-9dcfb878e590

BadgeVault's Flask API accepts forged admin JWTs because the checked-in default configuration still permits HS2...

Perl Python Bash

<> Extra Inspiration

LONG CONTEXT, API INTEGRATION

Harden Flask JWT Verification with Cargo Static Checks

a21b5c43-ca24-46fa-9efb-f33820de80c4

Without relying on a short spec, the 70k-token Markdown security bundle must be reconciled with the broken...

Python Rust TOML

API INTEGRATION, LONG CONTEXT

LONG CONTEXT, TOOL SPECIFIC

LONG CONTEXT, DB INTERACTION

Harden Gin Word Ladder Referee Defaults with OpenSSL Sn

7e5dd462-0719-4630-a243-15a824f47fcd

Harden the local Gin-based WordForge referee so tournament matches cannot start with leaked hints, fixed RNG...

Go Bash

Harden Go Module Releases with Signed Git Tags

593934fc-71bc-4a59-a11e-d11ba50ef64e

The Falcon Go module attestation gateway exposes a local `/verify-release` endpoint that must reproduce...

Python Go Bash

Harden Java Compose Release Gates with Signed Tags

46c2f70b-1feb-4847-86d4-b507733fdf1c

The Compose release gate service decides whether a deployment repository may be promoted based on...

Java SQL Bash

LONG CONTEXT, TOOL SPECIFIC

Harden Java FFmpeg Job Signing and Filtergraph Validati

de3df92c-aeaf-4696-9c56-a8b26a3fe3fe

A 70k-token partner incident dossier and a Postman-style API fixture disagree about which FFmpeg...

Java Bash

LONG CONTEXT

Harden Javalin Certificate Enrollment Defaults with jqwik Tests

882b9ebc-9527-4b29-905a-d3b6e04aa414

The Javalin-based AuroraCA enrollment service ships with permissive certificate profile defaults that can issue long...

Java

<> Extra Inspiration

LONG CONTEXT, API INTEGRATION

Harden Koa Dpop Token Binding from Audit Dossier

be99e5a6-d081-41ed-b30d-3b63066421b8

A 90,000-token merger security dossier and httpie replay pack describe how the AcmePay OAuth gateway must enforc...

JavaScript

LONG CONTEXT

Harden Kotlin FFmpeg Encryption Profiles with SQL Assertions

483b07dd-d00a-4099-ad79-c79e7468fcba

LONG CONTEXT

Harden MLflow Tracking Proxy Defaults in JavaScript

c0c1a6a7-3aed-4e14-be00-ca420434c542

DB INTERACTION, LONG CONTEXT

Harden Python Release Configs with GNU Make, DuckDB Assertions

abe6afc2-4b40-4e37-bcf7-d3b6a89175bb

A 70k-token broadcast security runbook defines how FFmpeg HLS and DASH profiles must handle AES-128 k...

Kotlin SQL YAML +1

An 85k-token incident transcript, architecture memo, and API request fixture describe how the Helios MLflo...

JavaScript

The YAML and TOML release policy bundle for Nimbus Samples currently trusts unsigned Git tags, permissive...

Python SQL Make

< > Extra Inspiration

LONG CONTEXT, DB INTERACTION

Harden Redis Backed Python Text Adventure Saves

10e8b6e0-8b4d-4baf-b38d-96bf8d9fbed6

The Redis-backed terminal adventure Asterion Vault ships with an insecure default save configuration that stores...

Python Bash

LONG CONTEXT

Harden Ruby Container Specs with yq Cloud Baselines

07b99134-a2ff-43ae-8992-bc110c2c01dc

Harden the insecure default container configuration for the fictional Atlas Claims intake worker. A Ruby analysis...

Ruby Bash

LONG CONTEXT

Harden SOPS Age Configurations with TypeScript Trace Audits

4335e2cb-d48b-45e6-b5d5-e5fe25114171

A 70k-token key-custody manual, mixed YAML and TOML SOPS profiles, and captured strace and lsof outputs defin...

TypeScript SQL

LONG CONTEXT, API INTEGRATION

Harden Spring Boot Kotlin Inference Defaults

eaef3dd2d-c8e6-48c6-b793-b98f520955a6

The Kotlin Spring Boot inference gateway ships with unsafe defaults for a customer-support intent classifier:...

Kotlin

TOOL SPECIFIC, LONG CONTEXT

Harden Superset Configuration Audits with Polars

81a701f9-9844-4151-8e70-bf5abb73a50b

The Superset tenant intake service currently accepts exported configuration bundles with insecure...

Python

API INTEGRATION, LONG CONTEXT

Harden Terraform Defaults for a Gin Graph API

85716427-7ec4-4dae-a962-26124233c540

With the only authoritative security requirements buried across a 68k-token incident dossier, the supplied topoma...

Terraform Bash Go

LONG CONTEXT, API INTEGRATION

Harden Terraform Defaults for a TensorFlow Js Media API

25f9237e-580f-411d-9ab8-c7fcc72ba713

The bundled TensorFlow.js media moderation API boots with insecure Terraform defaults: public debug...

JavaScript Terraform

LONG CONTEXT

Harden Terraform ImageMagick Policies After a Bisected Regression

7be7b6be-a7fb-4fff-a63a-274d35e36557

The RasterSafe Terraform module emits ImageMagick `policy.xml` profiles for a local evidence-thumbnailling...

Terraform HCL Bash

<> Extra Inspiration

LONG CONTEXT, DB INTERACTION

Harden Terraform Media-Signer Worker with cosign Trust Rotation

f5918a71-7c2d-4434-9969-04023ce4b311

The production evidence-ingest worker is quarantining every night-shift JPEG because its Terraform-managed...

Terraform HCL Bash +1

<> Extra Inspiration

LONG CONTEXT, API INTEGRATION

Harden Terraform-Driven Liquibase Rotation for a Maven Certificate API

01e002a3-2b41-4549-a6e6-ecb78f182423

The CertRelay Maven Spring Boot API accepted revoked client certificates after a rushed production key-rotation...

Terraform Java SQL +1

<> Extra Inspiration

LONG CONTEXT, DB INTERACTION

Harden TypeScript Go Module Admission Endpoint

05a3c5b8-9e4c-48f4-9fb1-ba6a6c7a5e37

The Go module admission endpoint should reject insecure dependency sets unless they satisfy the exception rules...

TypeScript SQL Go

<> Extra Inspiration

LONG CONTEXT

Implement a Python JWT Key Reconciliation Endpoint

70747e47-4694-452a-831b-6aef4a9d3ad1

The TokenTrust signing-key gateway receives conflicting nested JSON snapshots from its KMS inventory and...

Python Shell

DB INTERACTION, LONG CONTEXT

LONG CONTEXT, DB INTERACTION

LONG CONTEXT

Implement an npm JOSE Audit Library with DuckDB Evidence

c3a3c15d-9f89-4fdc-a4ff-d7151a9913d5

Implement the `helios-jose-auditor` JavaScript library for the Helios SSO edge gateway. The library reads a 70k...

JavaScript SQL

Implement FastAPI ImageMagick Authorization with Ed25519 Receipts

ca194a09-e93f-4678-82b2-7dbd768268d9

Only policy-compliant ImageMagick rendition requests receive signed authorization receipts from the...

Python SQL

Implement Go ImageMagick Verification for Pinned Git Releases

2303ae19-400a-4395-98d0-ecc4e92b7971

The Aurora Badge release gate approves signed PNG badge artifacts only when a nested campaign manifes...

Go Bash

LONG CONTEXT, API INTEGRATION

Implement PyJWT Audit Replay for a Flask Auth API

98c5a2cc-00e4-4949-9af7-c779dc1480d2

Implement the `auth\_audit.replay\_corpus()` library function that replays a large...

Python C

< > Extra Inspiration

LONG CONTEXT

Implement Python PKI and JWT Validator from a Security Runbook

807d4de9-2611-4efb-82b7-594c38284e5a

Develop a Python CLI that validates X.509 certificate chains, CSRs, CRLs, and JWT signatures against rules...

Python

LONG CONTEXT

Implement TypeScript Cryptographic Migrations for Go Module Lockfiles

64828c49-43b2-4311-a60e-32e9923bb066

Two release worktrees end with deterministic security policy databases whose canonical dumps match the...

TypeScript SQL Bash

LONG CONTEXT, API INTEGRATION

Implement TypeScript Jwks Signing Pipeline for Express

1a539e06-a382-4eab-837c-a114ab1efd9a

TOOL SPECIFIC, LONG CONTEXT

Migrate Cargo Registry Secrets with Terraform Credential Policies

a32a8a95-8168-4cd3-b791-06d0540ba989

LONG CONTEXT

Migrate Docker Compose TLS Secrets to a PHP Policy Endpoint

006238eb-68a6-4a61-bde7-29bc9136fb51

A 70,000-token partner-security dossier defines a request-signing protocol through interleaved meeting...

TypeScript JavaScript

A 60k-token Cargo registry migration dossier and a fixture of sparse-registry API requests define how five...

Terraform SQL TOML

The Tidegate appliance migration bundle contains legacy Docker Compose manifests, PEM material,...

LONG CONTEXT, API INTEGRATION, DB INTERACTION

Migrate Flask Redis Sessions to Hkdf Key Rotation

35f14ad7-1ab4-411f-b34c-e806b89a696f

All Flask auth sessions must validate against the new Redis-backed HKDF keyring while preserving approved...

Python

LONG CONTEXT, API INTEGRATION

Migrate GNU Make Lua JWS Gateway Configs for Flask

173625cf-602b-43f9-a906-6f58b325376d

With no network access and two release branches diverged, the legacy HMAC gateway must be migrated to t...

Lua Make SQL +1

<> Extra Inspiration

LONG CONTEXT, TOOL SPECIFIC

Migrate ImageMagick Media Attestation Worker to C

c289c7dc-44e7-4617-bb37-e234720ab072

The legacy pnpm media attest job intermittently marks tampered PNG thumbnails as trusted after an...

C JavaScript

DB INTERACTION, LONG CONTEXT

Migrate Kubernetes Secret Handling with TypeScript and DuckDB

466d9a5b-9d23-4b79-9261-9664a7fa5692

Migrate the legacy Orion container specs from inline secrets, HS256 JWT keys, and ad hoc TLS mounts to the...

TypeScript SQL Bash

LONG CONTEXT

Migrate Legacy Container Secrets to Terraform Hcl in Ja

92d91f2f-dae2-4e31-a29b-38b414cf4d17

Migrate a legacy container runtime specification for the Beacon ingest service into Terraform-managed secr...

Java Terraform

DB INTERACTION, LONG CONTEXT

Migrate Lua PKI Pinning with Git Submodule Tag Verification

cdd736dc-7935-4795-b41f-4665cf4da590

The Mercury PKI pinning setup is being moved from brittle Bash release checks to a Lua-based verification command...

Lua POSIX shell

< > Extra Inspiration

TOOL SPECIFIC, LONG CONTEXT

Migrate Maven Artifact Trust Policies with Python Cryptography

25143d4d-8a35-4a01-80c1-55276d4f1a1a

Successful migration leaves the Maven release pipeline using the new SQL trust schema, SHA-256 artifact digests,...

Python SQL XML

LONG CONTEXT, API INTEGRATION

Migrate mTLS ACL Graphs to a Gin Policy API

f8b90974-b9da-4646-9e0e-23ad9da92fa5

Without access to the original PKI operators, the only authoritative migration rules are buried in a 70k-...

C++ Go SQL +1

< > Extra Inspiration

LONG CONTEXT

Migrate Node OIDC Trust Configs with GNU Make

bb7f99c8-a3b2-4253-b2a6-f218964bad06

A 70,000-token Markdown migration dossier and a YAML/TOML trust configuration set describe how the...

JavaScript SQL

< > Extra Inspiration

LONG CONTEXT

Migrate Redis Secret Envelopes with Kotlin AES-GCM

bcea0a2b-1945-4242-8834-df6a86d69602

The Redis-backed secret registry stores legacy tenant credentials as nested JSON envelopes encrypted under...

Kotlin

API INTEGRATION, LONG CONTEXT

Migrate Terraform-Managed JWT Key Rotation Worker

de275c50-6284-4ec7-846c-2261ffbade1d

Migrate the legacy Terraform-managed JWT signing-key rotation flow from shell cron jobs into a Python...

Python HCL Bash

< > Extra Inspiration

LONG CONTEXT, DB INTERACTION

Migrate TypeScript Media Signing Worker to Ed25519

a1db325c-162e-4d4c-afed-8f909e19d991

Legacy notarization jobs fail after the evidence archive moved from RSA-SHA1 signatures to Ed25519...

TypeScript SQL

< > Extra Inspiration
